There's a mule corpse in the back here - take it, and then jump across the skull and then down to the right. There's a garbage bin here, behind the barricade - try to get the bin, but I think it's best if you let it fall to the ground as soon as you jump onto it. Go forward and around the corner on the left, hugging the wall. Go forward, hugging the wall and avoid the sniper. Go forward, hugging the wall and ignore the cannon. When you get to the tunnel (which you probably shouldn't be in yet) go back to where you were, then go forward, hugging the wall, and avoid the sniper there. A garbage can is just here, behind the barricade, and it's important that you keep it in the general direction of where you want to go, otherwise the enemy can just run around and pick it up, preventing you from reaching it. This can be quite annoying, because once you get into the back of the map it's easy to get lost. Go back to where you were, hug the wall and dodge the sniper there, then go into the tunnel. There's a garbage can in there, but now you're in the back of the map again, so you might get lost. You'll want to go into this tunnel and then turn the other direction and go forward, hugging the wall. When you get to the bridge, turn back to the right and go forward. Go forward. Hug the wall and avoid the sniper, then go behind the barricade. There's a garbage can there, go forward and go around the corner to the left, hugging the wall. Turn left, hugging the wall and go forward. Then hug the wall again and go left. Turn left, hugging the wall and go forward, then go right and then forward. Turn left and go forward. Turn right and go forward, hugging the wall. There's a garbage can behind the barricade, but it's too far away for you to grab. Go back and turn right, then forward and go around the corner. Turn right and go forward, then turn left and go forward. Turn left and go forward, hug the wall and go around the corner. Turn right and go forward, then turn left and go 82157476af
